CHURCHILL IS 86

Sir Winston Churchill, who has been called "the greatest man the 20th century has produced", will celebrate his 86th birthday on November 30th 1960. He is still the tough old warrior - his recent fall, which could have had extremely serious consequences for a man of well over eighty, has apparently left him none the worse and his doctors confidently expect him to get out and about again in time for his birthday.

... pictures taken during his years of glory, as Britain's wartime Minister, when he led the people of the British Empire in the long and successful battle with Nazi Germany. Though his health has given cause for anxiety at intervals during the last few years Sir Winston seems ready to fight still more battles. On November 30th the flood of birthday wishes that will arrive at the great man's house, Chartwell, in Kent, will be coupled with the hope that he will be spared for a number of years yet to come.
